

Cornerstone Technologies, a Silicon-valley based business, has designed our migration services to navigate customers through the turbulence of cloud migrations.

In doing this, we help accelerate adoption and utilization of our customer's cloud services to maximize their investment, all while minimizing the impact to end users.

Our Office 365 Migrations and Expertise covers the following:

- Design of co-existence environments
- Consolidation of multiple email system sources
- Migration of Exchange, Notes, GroupWise, or Gmail
- Certified deployment of migration tools (e.g. Dell Migration Manager, PaaS, BitTitan, etc.)
- Deep technical collaboration with business acumen

Our design and environment assessment workshops include the following:

- Structure agenda covering topics relevant to the Customer's initiatives and project goals
- Onsite Q&A with a senior consultant with at least 20 years of technology experience
- Access to subject matter experts across the entire team via assigned consultant
- Documented recommendations
- Consult senior management on successful strategies and tactics that are vendor agnostic
- Assessment of environment and related subsystems
- Policy and procedure review with documented recommendations
