

Cornerstone Technologies, a Silicon-valley based business, has designed our migration services to navigate customers through the turbulence of cloud migrations.

In doing this, we help accelerate adoption and utilization of our customer's cloud services to maximize their investment, all while minimizing the impact to end users.

Our Office 365 Migrations and Expertise covers the following:

- Design of co-existence environments
- Consolidation of multiple email system sources
- Migration of Exchange, Notes, GroupWise, or Gmail
- Certified deployment of migration tools such as Dell Migration Manager for Exchange or Lotus Notes

We Provide the Following Services:

- Setup and deploy Office 365 tenant
- Setup and configure Exchange hybrid environment
- Setup and configure Azure Active Directory synchronization services
- Tailor migration tactics relevant for Customer's environment and use cases
- Develop custom and automated migration procedures
- Provide fully managed migration services or train Customer IT to perform migrations
- Managed services after migration to allow Customer IT team to ramp up skills
