Cornerstone Managed Data & AI Platform Support

*If you could do *anything* with your data, what would you want that to be? We can get you there.*

Ongoing support and optimization for your data and AI tools, including Microsoft Copilot and other emerging platforms. We ensure your unique systems stay healthy, secure, cost-effective, and aligned with your business goals.

Data with intention, AI simplified and optimized.

Data Flow Heath Checks

We keep an eye on your data pipeline, ensuring your information is flowing properly, catching issues early, and helping fix problems like missing or misformatted data.

Cost & Usage Reporting

We provide regular updates that clearly show *which* of your tools are being used, *where* you're spending the most, and *how* to cut unnecessary costs without affecting performance.

Copilot Setup & Ongoing Management

- Microsoft Copilot has an extensive suite of capabilities that can augment your team and produce ROI. We help you set up those features, manage who can use what, and ensure new capabilities are rolled out smoothly and securely with intention.

AI Outcome Reviews

- AI can be an advanced business function that produces a multitude of outcomes. This makes your intent and goals the most important aspects to know and track.

- We help assess whether tools like Copilot are delivering accurate, useful results, and steer direction accordingly to improve effectiveness and adoption.
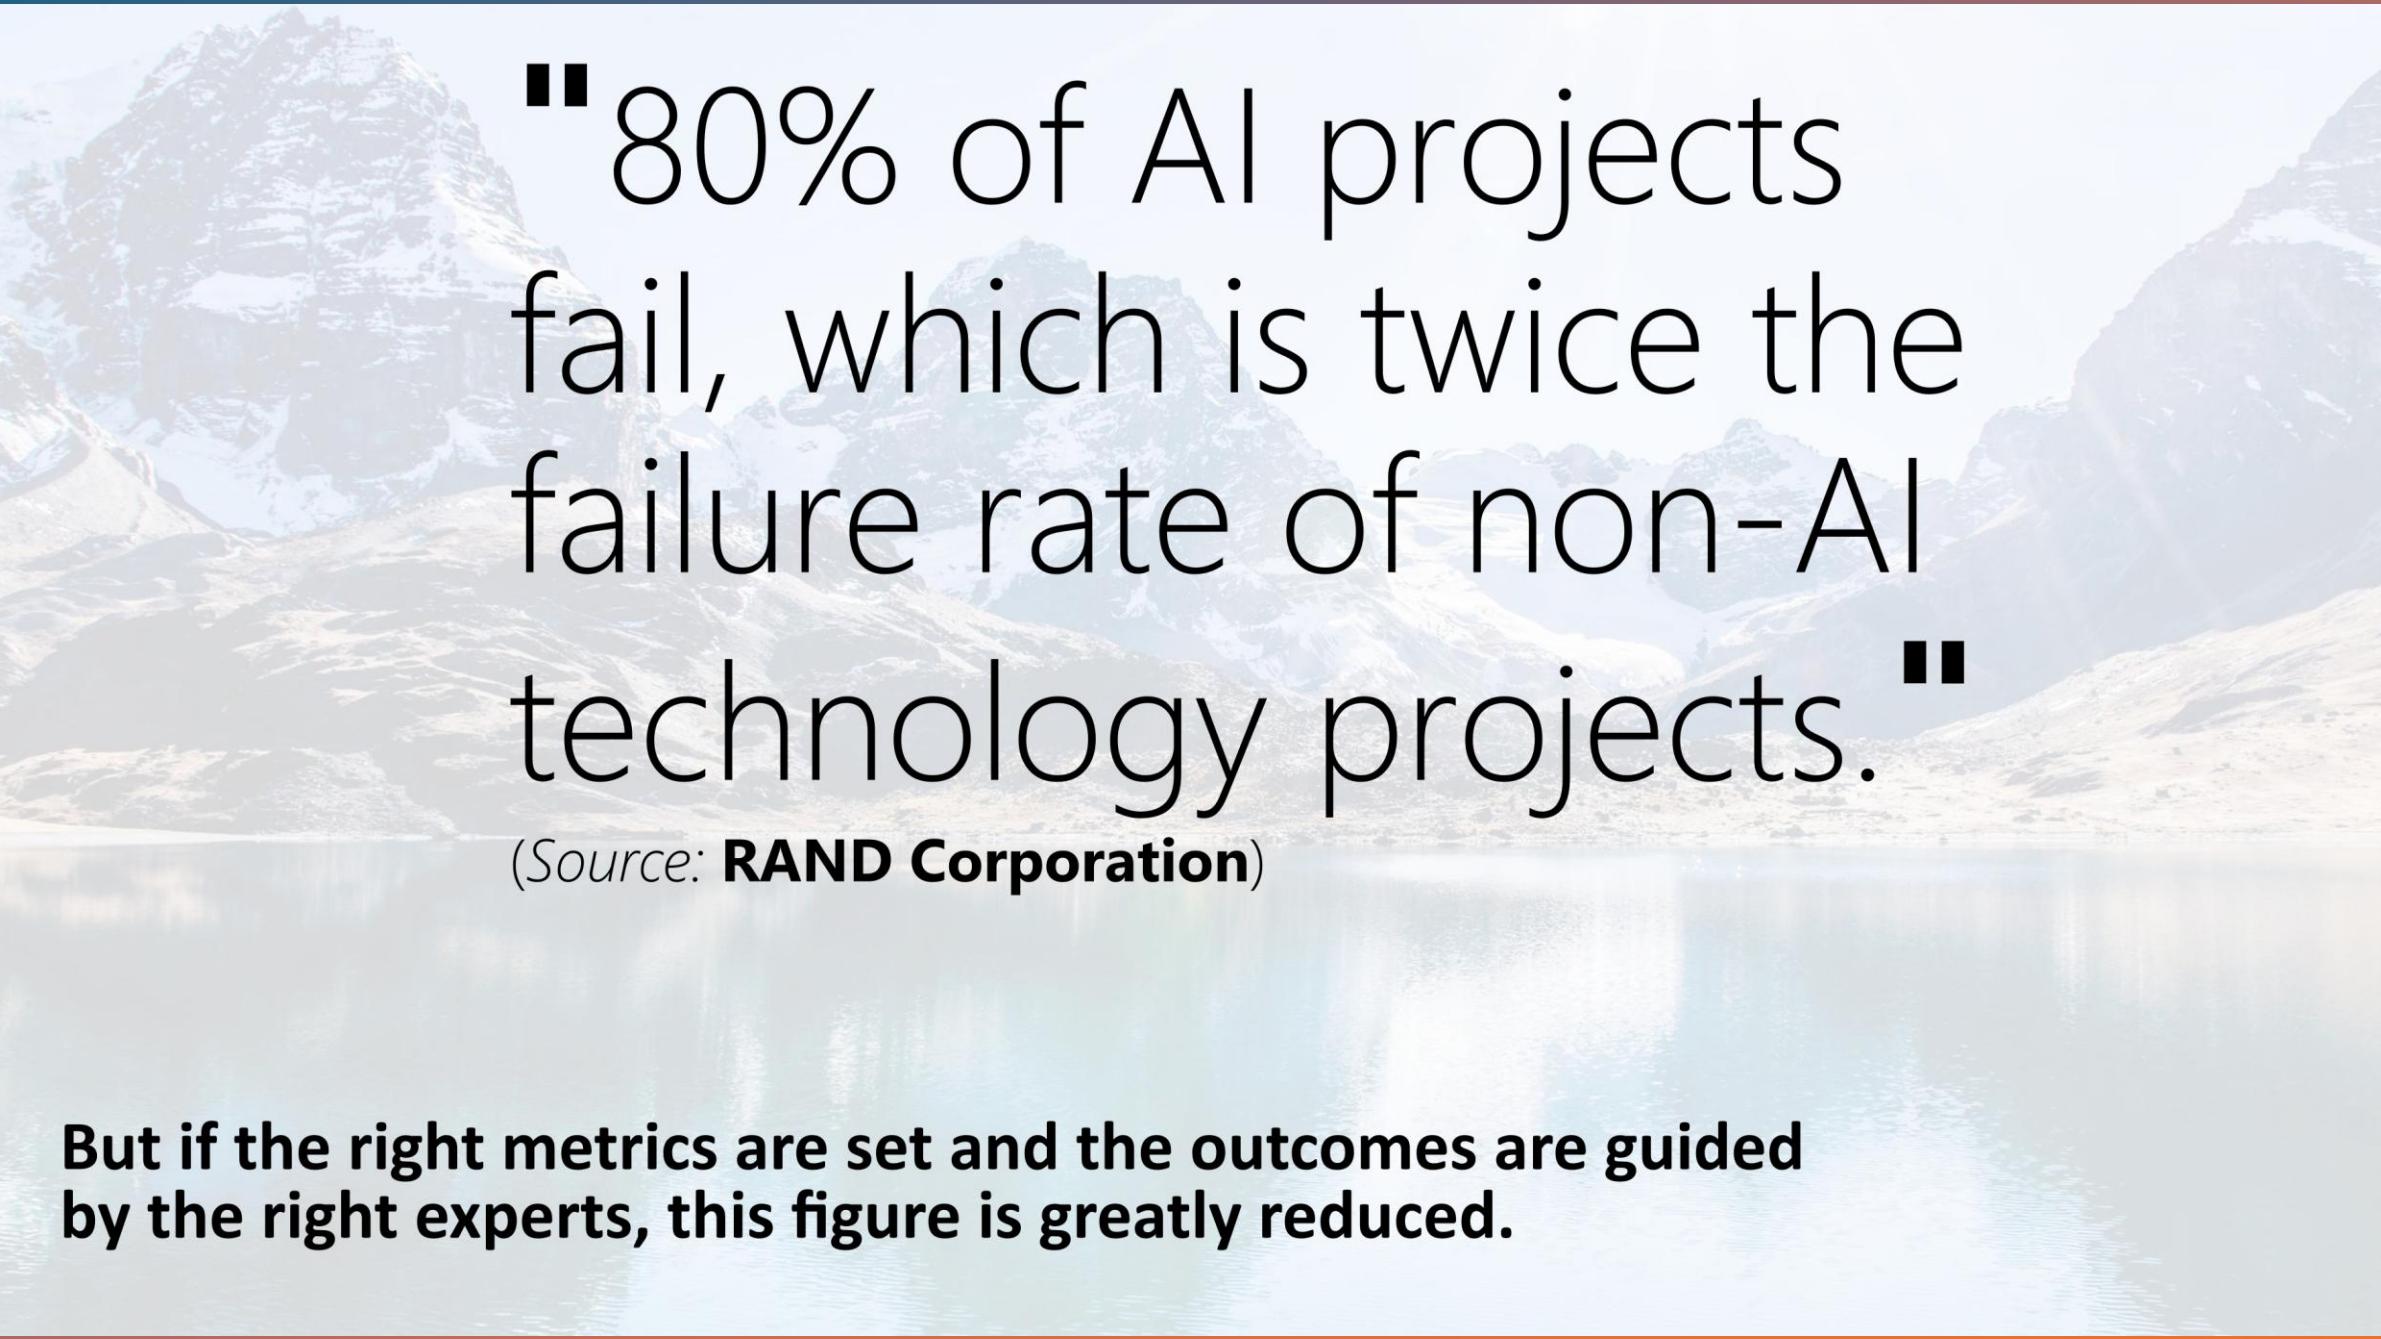

"80% of AI projects fail, which is twice the failure rate of non-AI technology projects.**"**

(*Source:* **RAND Corporation**)

But if the right metrics are set and the outcomes are guided by the right experts, this figure is greatly reduced.

Let's simplify your AI.
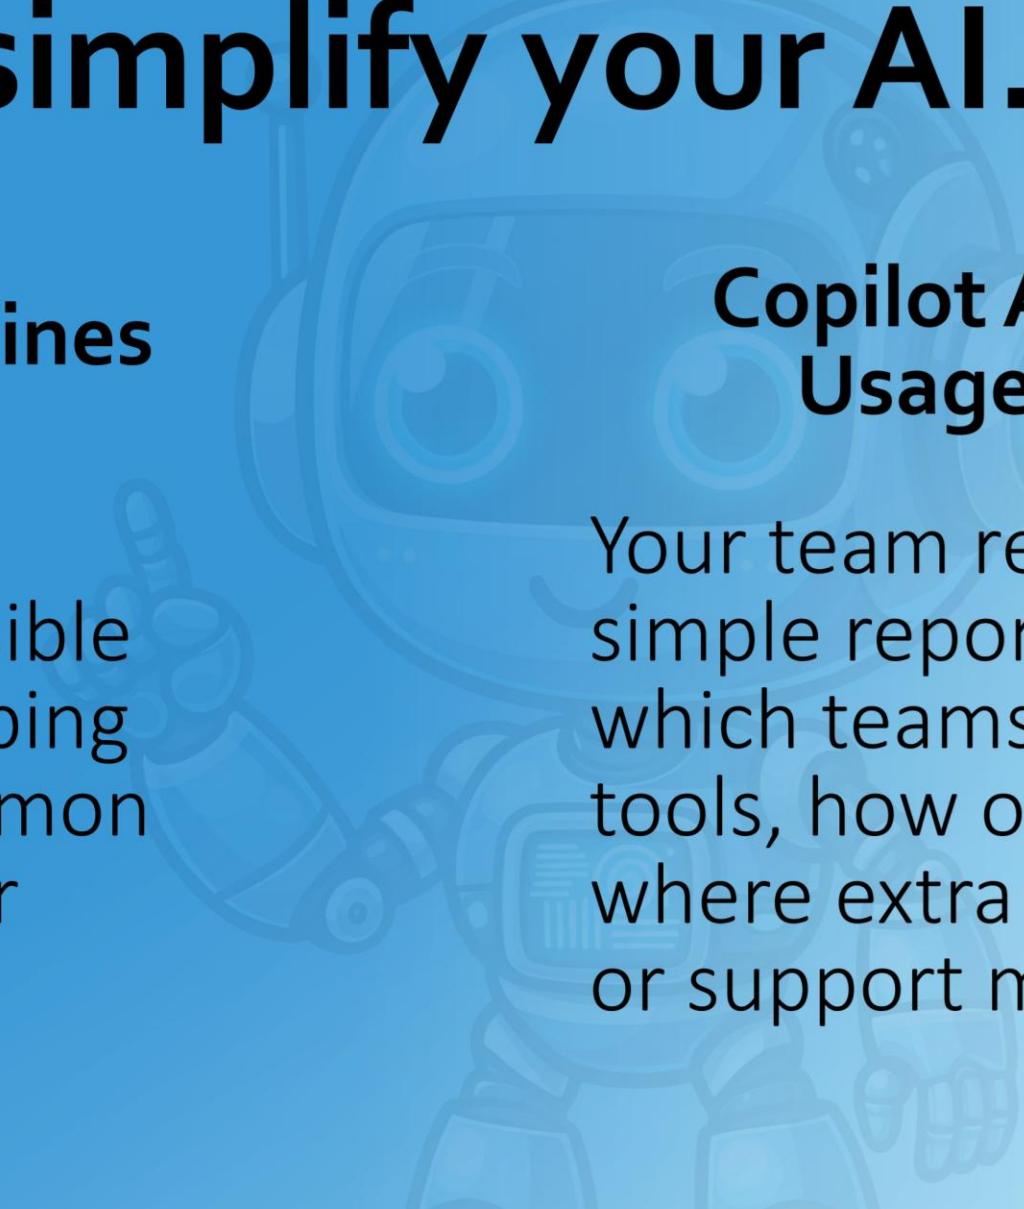

Smart AI Use Guidelines

We provide guidance on creating safe, sensible AI usage policies, helping your team avoid common risks, maximizing your AI investment.

Copilot Adoption & Usage Insights

Your team receives simple reports that show which teams are using AI tools, how often, and where extra training or support may be needed.

Platform Maintenance & Reliability

Routine checkups for your data systems, including software updates, storage and capacity planning, backup testing, and compliance reviews.

Because compliance, capacitiy, and backups are routine for us.
